UNITED STATES FOREIGN TRADE

SUMMARY REPORT
FT 950-I

JANUARY 1961

FOR RELEASE
March 23, 1961

IMPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States general imports (unadjusted for seasonal change) from \$1,157.1 million in December to \$1,123.6 million in January¹ reflected decreases in imports from all areas except Latin American Republics. Changes in the dollar values of imports from all areas from December to January are as follows: Western Europe, from \$337.0 to \$308.2 million; Canada, from \$223.2 to \$208.3 million; Latin American Republics, from \$277.0 to \$295.5 million; and "all other countries," from \$319.9 to \$311.5 million.

The Bureau also pointed out that, from December to January, imports from O.E.E.C. countries fell from \$330.7 to \$300.0 million and those from sterling area countries from \$183.2 to \$176.2 million. Decreases were reported in imports from all continents except South America, Africa, and Australia and Oceania.

Imports from Europe fell from \$343.4 million in December to \$315.3 million in January owing chiefly to

¹On a seasonally-adjusted basis, total general imports increased about 2 percent in January over the comparable December total (\$1,119.1 million in January versus \$1,099.7 million in December. See the January 1961 issue of Report No. FT 900-I). Seasonally-adjusted data are not available by country of origin.

lower levels of imports from individual countries of this continent as follows: Belgium and Luxembourg, from \$27.7 to \$17.3 million; West Germany, from \$78.8 to \$69.2 million; United Kingdom, from \$68.6 to \$60.6 million; Switzerland, from \$18.4 to \$12.5 million; and Italy, from \$32.7 to \$29.1 million. These decreases were slightly offset, however, by an increase in imports from Turkey, from \$6.2 to \$15.0 million. The drop in imports from North America from \$346.0 to \$321.7 million was primarily the result of the decrease in imports from Canada, as noted above, and to a drop in imports from the Dominican Republic, from \$20.8 to \$8.9 million. A drop in imports from the Republic of Indonesia, from \$22.1 to \$12.4 million was the chief factor in the decrease in imports from Asia from \$209.5 to \$196.8 million.

During the period, imports from South America rose from \$197.5 to \$224.6 million reflecting increases in imports from Chile, from \$9.5 to \$21.2 million; Venezuela, from \$83.9 to \$91.8 million and Colombia, from \$24.7 to \$32.4 million. Less noticeable increases were reported in imports from Africa, and Australia and Oceania, from \$42.8 to \$46.4 million and from \$17.7 to \$18.8 million, respectively.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics.

COUNTRY DEFINITION: Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined or manufactured, the country actually shown in the statistics may in an number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. It follows, therefore, that imports from such merchandising or transshipment countries are likely to be overstated and imports from other countries correspondingly understated.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. They exclude United States import duties. None of the values have been adjusted for changes in price level.

EFFECT OF SAMPLING: Formal entry shipments valued less than \$100 and informal entry shipments valued \$250 or less (less than one percent of total import value) are estimated by sampling. The estimated values are included in the area, continent, and country totals in the table. The variability in the import figures due to sampling is no more than three percent or less than \$50,000. For further information regarding the sampling procedures, see the "Explanation of the Sampling Procedure for Estimating Low Valued Imports" in the foreword of Report No. FT 110. The largest variation from rounding of figures is \$50,000.

Further information regarding coverage, country definition, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 110. For complete statement, see the foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES GENERAL IMPORTS, BY COUNTRY OF ORIGIN: JANUARY 1961 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. General imports are a total of imports for immediate consumption plus entries into bonded warehouses. Figures for 1961 are as originally issued and have not been revised to include published corrections. Figures for 1960 include revisions published with the December 1960 reports, or earlier, but do not include revisions published during 1961. See "Explanation of Statistics" for information on sampling procedures and effect thereof on the data shown.)
